

- 1) Wipe your wall removing all dust and obvious contaminants. Lay your Peel & Stick Mural face down on a flat surface. Pull back approximately six inches of the release liner and put a sharp crease in it. Be careful not to crease the face of the mural.

- 2) Align the mural on the wall and use finger pressure to tack it in to place. Using a soft cloth, press the mural into place, moving from the center of the mural toward the right. Return to the center and move toward the left.

- 3) Pull the liner down a few more inches and continue to press the mural in place as described in Step 2. Repeat this process until you reach the bottom of the mural.

- 4) Using a smaller circular motion and slightly more pressure, re-press the outer edge (about three inches wide) of the entire mural with the cloth.

Please Note:

- Your Peel & Stick Mural works best on a smooth vertical wall surface. Textured walls will not allow for good adhesion.
- Clean your Peel & Stick Mural with a damp cloth. Do not use household cleaners.
- Do not apply your Peel & Stick Mural on or near extreme heat sources such as lights or lamps.
- Dust, dirt, moisture, and oils from your hands will diminish the life of the adhesive.
- Larger murals may require help. Ask a friend to give you a hand.

To Remove or Reposition Your Peel & Stick Mural:

Start from one corner and carefully peel the mural away from the wall. Move slowly and use gentle, even pressure.

While this product is warranted against all manufacturing defects, 4walls.com cannot be responsible for improper installation or problems arising from defects in the construction, surface, or preparation of the wall. Because all wall surfaces are different, we can not be responsible for any paint or wall damage that might occur during installation or removal. See reverse for complete warranty information.
