

### BEFORE YOU BEGIN

- Self-adhesive tabs (included) are used to install this mural. These tabs work best on a smooth, clean, dry, painted, flat surface. Textured, glossy, or metallic-painted walls will not allow for good adhesion.
- **REMEMBER:** Self-adhesive materials like the first thing they meet! If that happens to be a dirty surface, they'll stick to the dirt, resulting in a weak bond. If it's a clean wall, they'll stick to the wall, and you'll be far happier with the outcome. In short, make sure your walls are clean before you apply your peel & stick tabs!

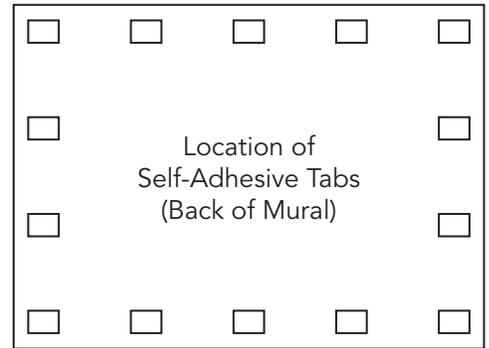

### APPLICATION

Lay your mural face down on a clean, flat surface. On the **back side**, affix self-adhesive tabs around the perimeter, about **one quarter inch** away from the edge:

- Affix 1 tab in each of the 4 corners
- Evenly space 3 more tabs along the top and bottom edges
- Evenly space 2 more tabs along the left and right edges

Using a tape measure or level, determine the location of the top edge of the mural on your wall. **Lightly** make small dash marks with pencil to indicate this line on your wall.

Remove the backing from the adhesive tabs on the **top edge only**. Align the mural on the wall (slightly covering your dash marks) and use finger pressure to tack the upper left corner into place. Now following the line, press the upper edge into place, moving toward the right, and **keeping the mural taut** as you go.

Step back and determine if you are happy with the final location. Then go back and firmly press the upper edge into place.

Remove the backing from the remaining tabs. Gently pull the bottom center taut and press the center into place. Press the bottom edge into place moving outward toward the edges as you go, keeping the mural taut. Press the remaining side tabs into place and again step back to check that the mural is hanging straight and evenly. Firmly press the tabs into place.

### CARE & REMOVAL

Clean your mural with a damp cloth. Do not use household cleaners. To remove the mural, start from one corner and carefully peel it away from the wall. Move slowly and use gentle, even pressure. Remove the adhesive tabs from the wall and mural and carefully roll the mural to store.
